

ERA-NET PathoGenoMics Partnering Workshop

2006-01-04

ERA-NET PathoGenoMics organizes a partnering workshop in connection with the first multinational Call for Applications on pathogenomics. The workshop, scheduled for February 1st 2006, will take place in Schloss Hohenkammer (near Munich), Germany.

The workshop is intended to foster the networking between potential research partners towards collaborative research projects on genomics of pathogenic bacteria and fungi.

The workshop offers researchers a forum to meet, to exchange research ideas, to present their expertise and to create contacts.

The ERA-NET PathoGenoMics Partnering Workshop is organized in collaboration with The Network of Excellence " EuroPathoGenoMics".

The deadline for registrations to the Partnering Workshop is January 5, 2006. There is no registration fee. Later registration is possible, but pre-reserved rooms will not be available after the 5th January and presentations could possibly not be accepted any more.

Detailed information and registration forms may be found at: <http://www.pathogenomics-era.net>
